

Job Title : Director Translational Sciences

OCTIMET Oncology NV is a new company that acts as a translational accelerator, focusing on creating value for investors and patients by providing rapid clinical proof of concept for cancer therapies through innovative clinical development strategies and patient centered biomarker approaches. OCTIMET was set-up in 2016 and is run by a highly experienced management team. The current focus is on its clinical stage asset OMO-1, a highly selective small molecule MET inhibitor that will be developed with specific biomarkers.

OCTIMET has recently secured EUR 11.3 million in a Series A investment round, enabling the company to accelerate the development of OMO-1 as single agent or in combination with standard of care and targeted agents for the treatment of solid cancers. In order to strengthen our team we are currently looking for a Director Translational Sciences.

Roles and Responsibilities:

- Design, implement and co-ordinate non-clinical studies in the areas of pharmacology and toxicology
- Design and implement biomarker strategies
- Support of Clinical Trials: biomarkers, supplier coordination
- Lead and coordinate external suppliers, such as CROs or external consultants around practical resource needs and budget in order to deliver against agreed upon objectives
- Help write and manage grant applications
- Prepare and submit scientific manuscripts
- Plan and monitor timelines, keep development plans up-to-date e.g. for monthly updates to the board
- Prepare, update and review non-clinical documents for regulatory authority submission

Experiences and expertise required:

- Master's Degree (PhD desirable) in biomedical or natural sciences
- Experienced scientist with 5-10 years experience in the pharmaceutical or biotech industry.
- Deep understanding of the role of translational research/medicine and clinical biomarkers in drug development
- Record of accomplishment in oncology and/or tumor-immunology disease biology
- Working knowledge of Pharmacology and Toxicology
- Experience in conducting or outsourcing non-clinical studies
- Ability to multitask across multiple development assets.
- Expert knowledge in translational oncology
- Basic Knowledge in clinical development and/or regulatory affairs
- Experience with collaborative research including project planning skills

To apply, please send your CV and salary expectation to:
